

Early Life Foundations
Education Consultancy, Research & Parent Support

Conference 2016

Learning for Life – Intentional, Visible & Personalised National Education Summit

Early Childhood & Primary Educators

This Conference will inspire educators to think of the child beyond the academic: that the child comes with a context of self, peers, family culture and the broader community. Education of children is about foundations for life: literacy, numeracy, identity, developing a sense of who they are, strengths, resilience, self expression, building authentic links to learning, a love of the arts, sciences and a strong sense of self, community and culture.

Why should you attend this Conference?

You will

- Enjoy 'hands on' and practical experiences
- Be challenged to think about the notion of the whole child and how this impacts on your daily practice
- Discover time effective planning and documentation
- Understand children and their behaviour
- Understand key elements of personalizing learning

Keynote Speakers

**MAGDA
SZUBANSKI**

**KATHY
WALKER**

3 September 2016

**Melbourne Convention and Exhibition
Centre**

Bookings Open 14 December 2015:
